Infrastructure

Tag Polymers's factory is set up on around 2 acres of land, providing ample space for its plastic molding and assembly operations. This spacious setup allows the company to house its machinery and equipment in a well-organized and efficient manner, which can result in greater productivity and faster turnaround times for its customers.

Machinery

Tag Polymers has a range of imported machinery for plastic molding, ranging from 100T to 1000T.

This range of machinery enables the company to produce plastic products of varying sizes and complexity, and cater to a wide range of customer requirements.

Products

- MOTHERSON AUTOMOTIVE TECHNOLOGIES & ENGINEERING (MOTHERSON GROUP)
- SMRC AUTOMOTIVE PRODUCTS (I) PVT. LTD. (MOTHERSON GROUP)
- VARROC POLYMERS PVT. LTD.
- EAGLE CONSUMER PRODUCTS PVT. LTD.
- RAINBOW GARNISHERS PVT. LTD.

Future Plans

Our plan for the next year includes a few exciting updates to our operations. First and foremost, we'll be adding five new machines that can handle a tonnage capacity of 1000 to 1500. These machines will be top-of-the-line and equipped with robotics technology to help us produce even more efficiently and effectively.

In addition to these new machines, we're also going to be building a new paint shop. This will allow us to complete more of the production process in-house and ensure that our products are always finished to the highest standards.

We're confident that these changes will help us provide even better products and service to our customers in the years to come.
